Focus Question
What does a seed need
to grow?

A small seed falls to the ground
and becomes buried in the soft soil.

A Seed Grows

3

4

The seed is buried in the soft soil,
and the rain falls.

The rain soaks into the soil
that holds the small seed.

A Seed Grows

5

9

The small seed soaks up water from the rain.

The water helps the seed,
and roots grow down deep into the soil.

A Seed Grows

7

8

The leaves and a stem
grow up through the ground.
The leaves gather in the sunshine.

The plant uses sunshine to make food.
The rain and the soil help the small plant.

A Seed Grows

9

The plant grows taller,
and more leaves grow on the stem.
The roots grow longer.
They go deep in the ground.

10

The big plant grows flowers.
The flowers make seeds.

A Seed Grows

11

A new seed falls into the soft soil.
What will happen next?
