ANIMAL SKELETONS

Written by Kira Freed • Illustrated by Cende Hill

Focus Question
How are the skeletons of
different animals connected
to the way each lives?

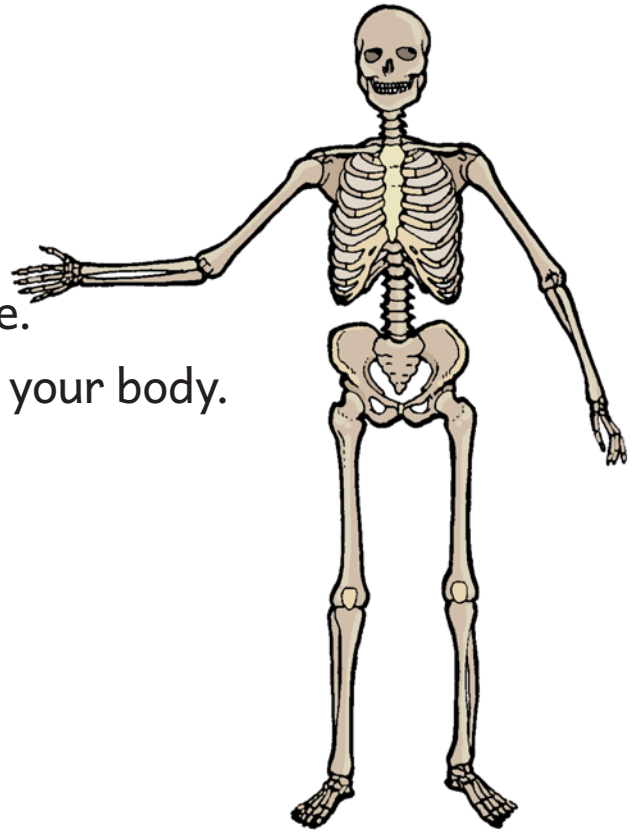

The bones in your body
make up your skeleton.
You have 206 bones.
Bones give your body
shape and support.
They keep the soft parts
inside you safe.

Bones come in many shapes and sizes.
Your arms and legs are long bones.
Your pelvis and shoulder blades are flat bones.
The bones in your wrists, hands, ankles, and feet are small.

This is what your skeleton looks like.
Look at the many kinds of bones in your body.

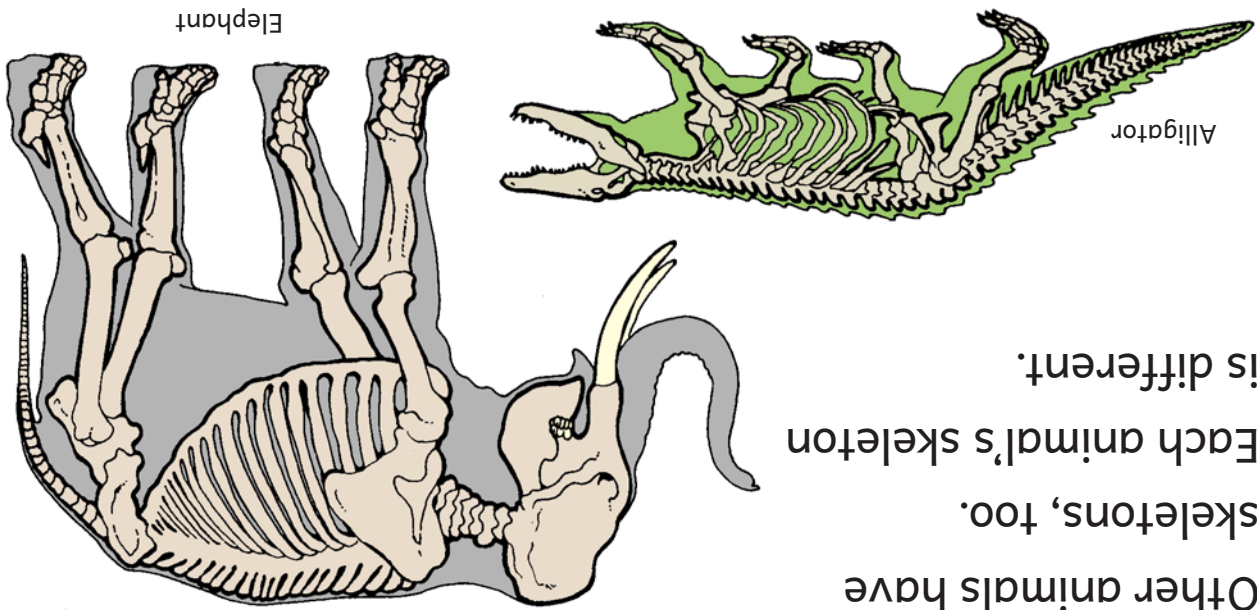

Animal Skeletons

5

Some are short, some are tall,
some are light, and some are strong.

6

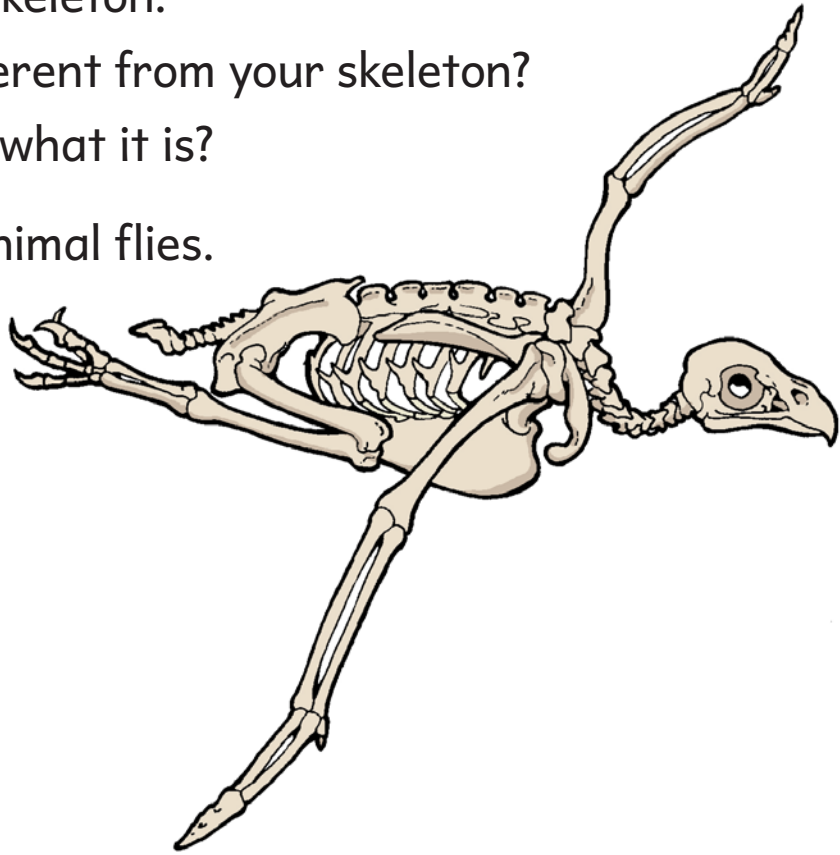

Other animals have
skeletons, too.
Each animal's skeleton
is different.

Look at this skeleton.

How is it different from your skeleton?

Do you know what it is?

CLUE: This animal flies.

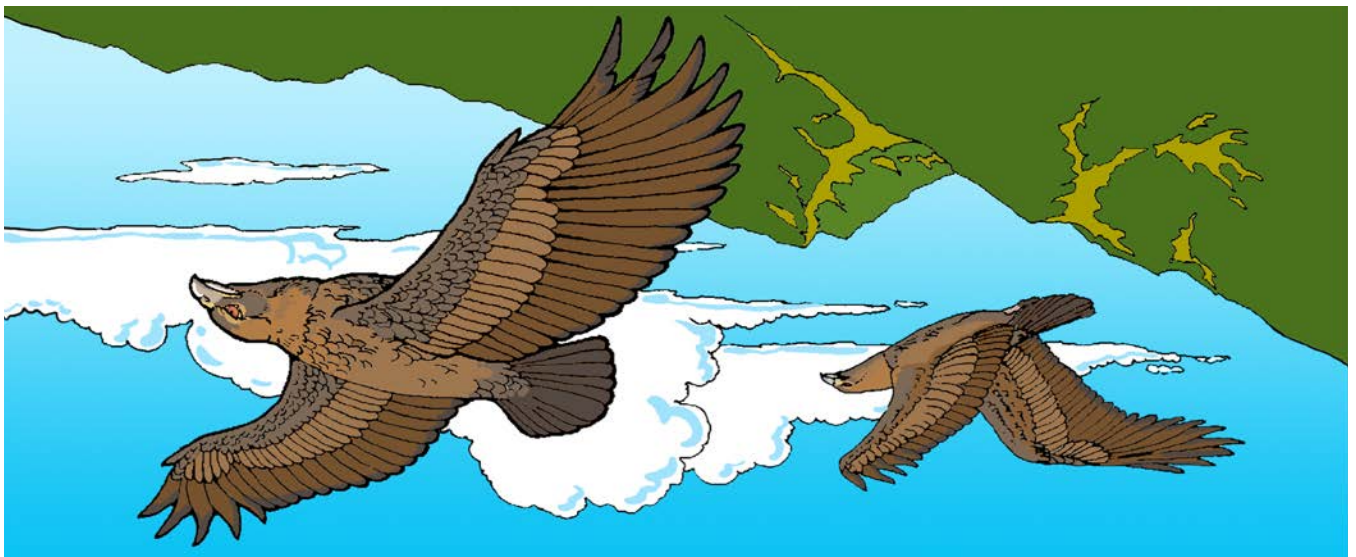

Animal Skeletons

7

8

It's an eagle.
Its bones are hollow and light.
Wing feathers attach to the wing bones.

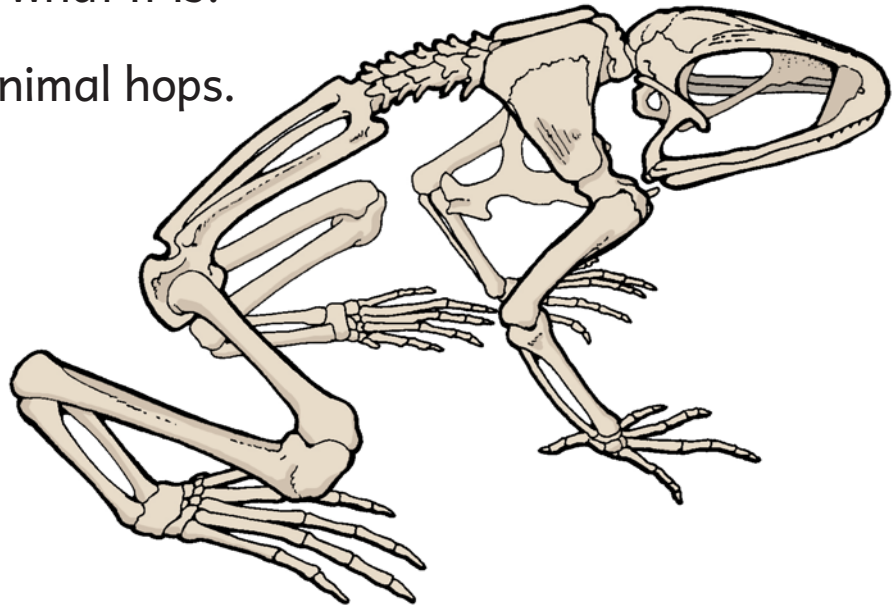

Look at this skeleton.

How is it different from your skeleton?

Do you know what it is?

CLUE: This animal hops.

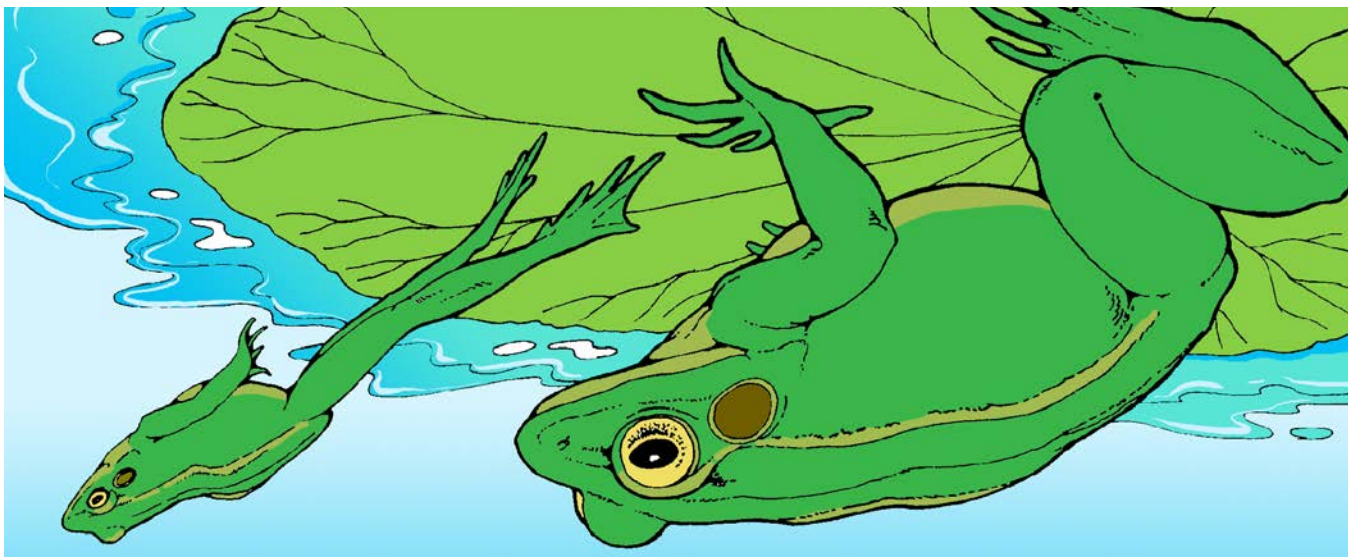

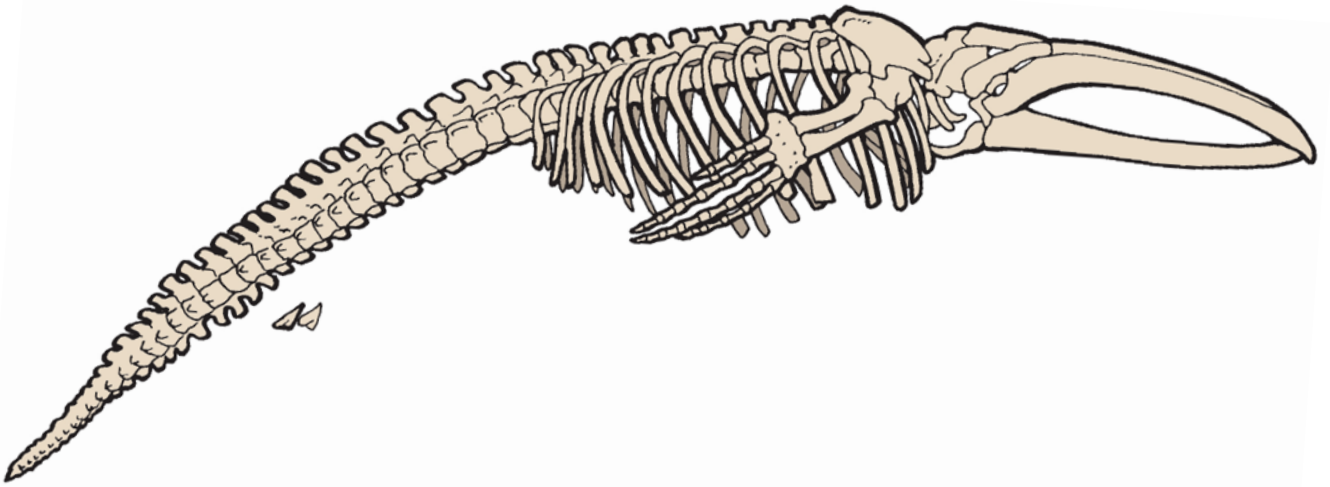

Animal Skeletons

9

10

It's a frog.
It has long back legs for hopping.
Its back legs are longer than its body.

Look at this skeleton.

How is it different from your skeleton?

Do you know what it is?

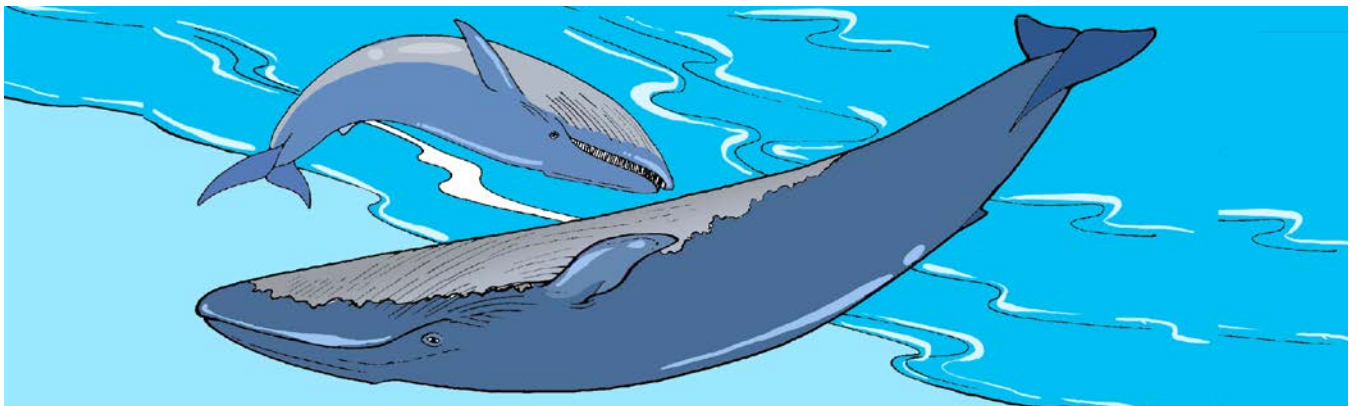

CLUE: This animal swims.

Animal Skeletons

11

12

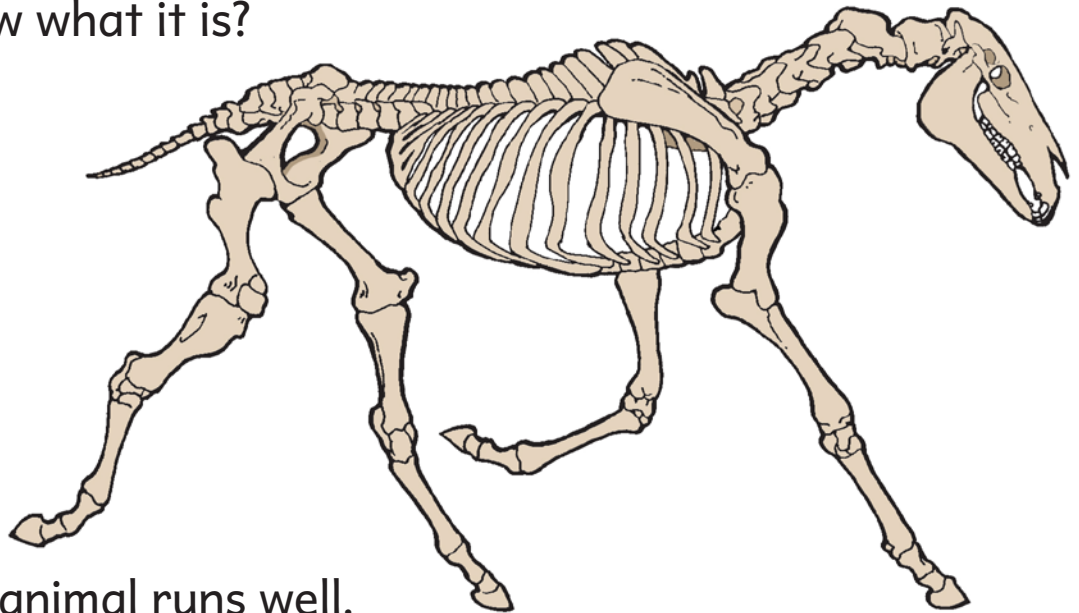

It's a blue whale.
It has no leg bones. Its arms are flippers.
Whales are supported by the water.
If a whale lived on land,
its skeleton would have to be much stronger.

Look at this skeleton.

How is it different from your skeleton?

Do you know what it is?

CLUE: This animal runs well.

Animal Skeletons

13

It's a horse.
It has long legs for running.
A horse has a large rib cage to keep its large lungs safe.
It needs large lungs to take in lots of air when it runs.

14

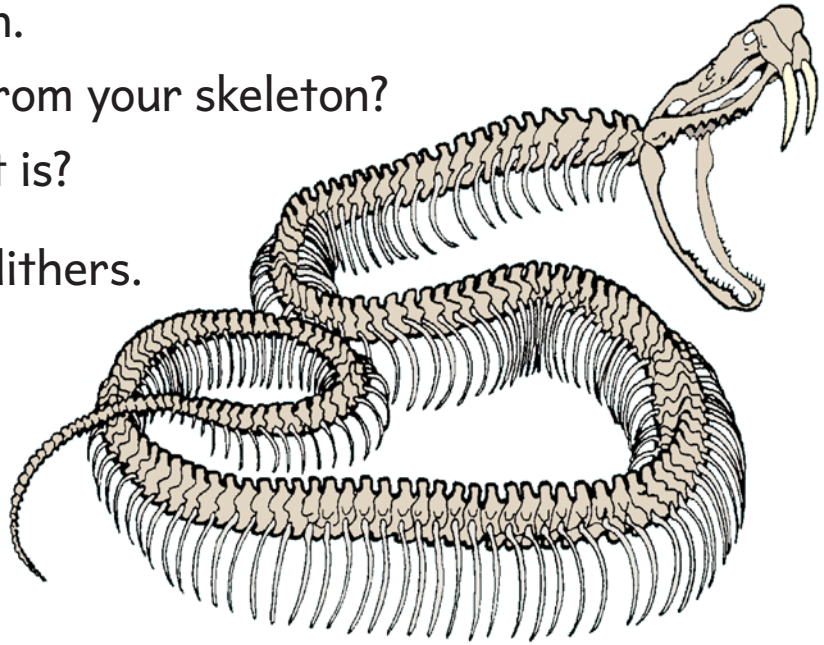

Look at this skeleton.

How is it different from your skeleton?

Do you know what it is?

CLUE: This animal slithers.

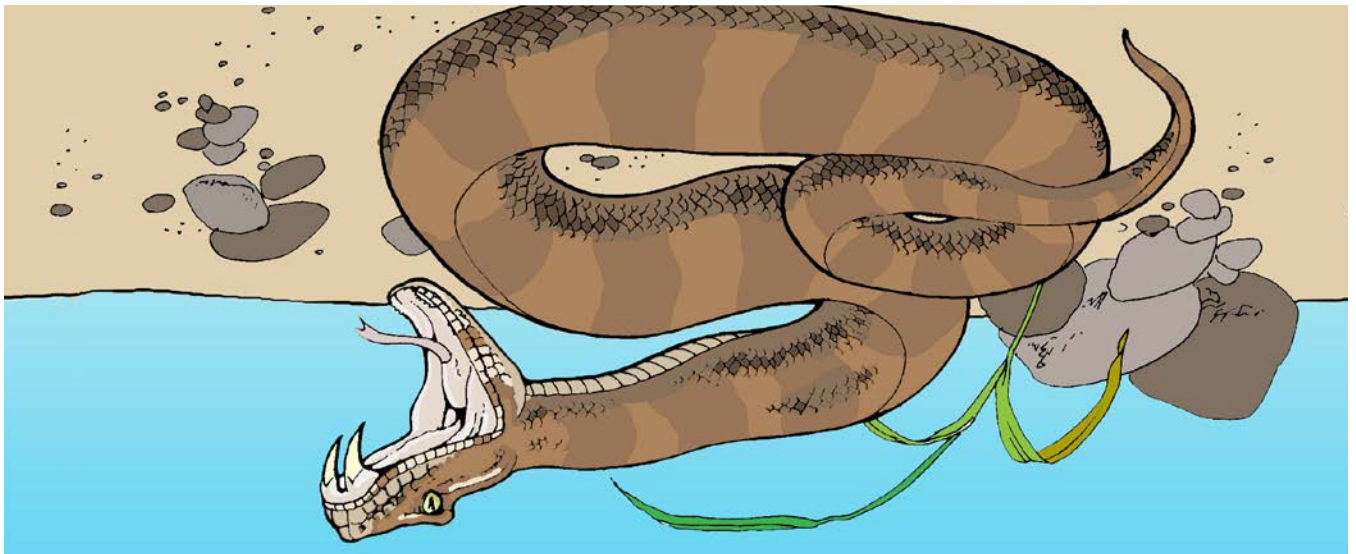

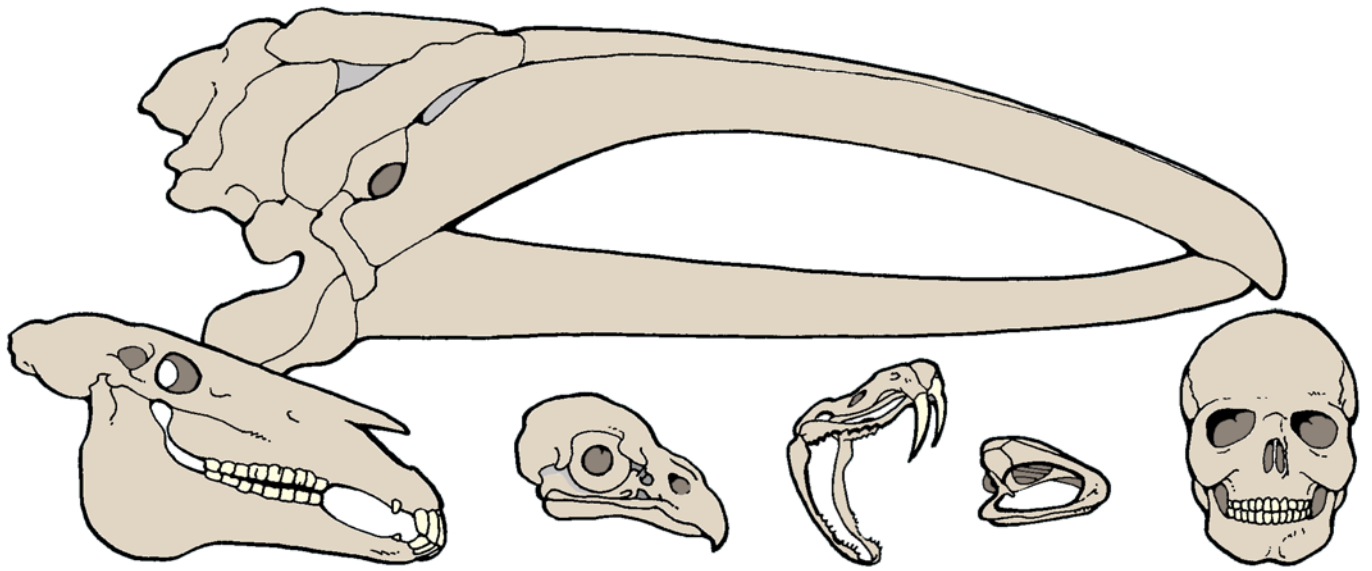

Animal Skeletons

15

16

It's a snake.
It has no arms or legs.
Its skeleton is one long backbone with ribs.

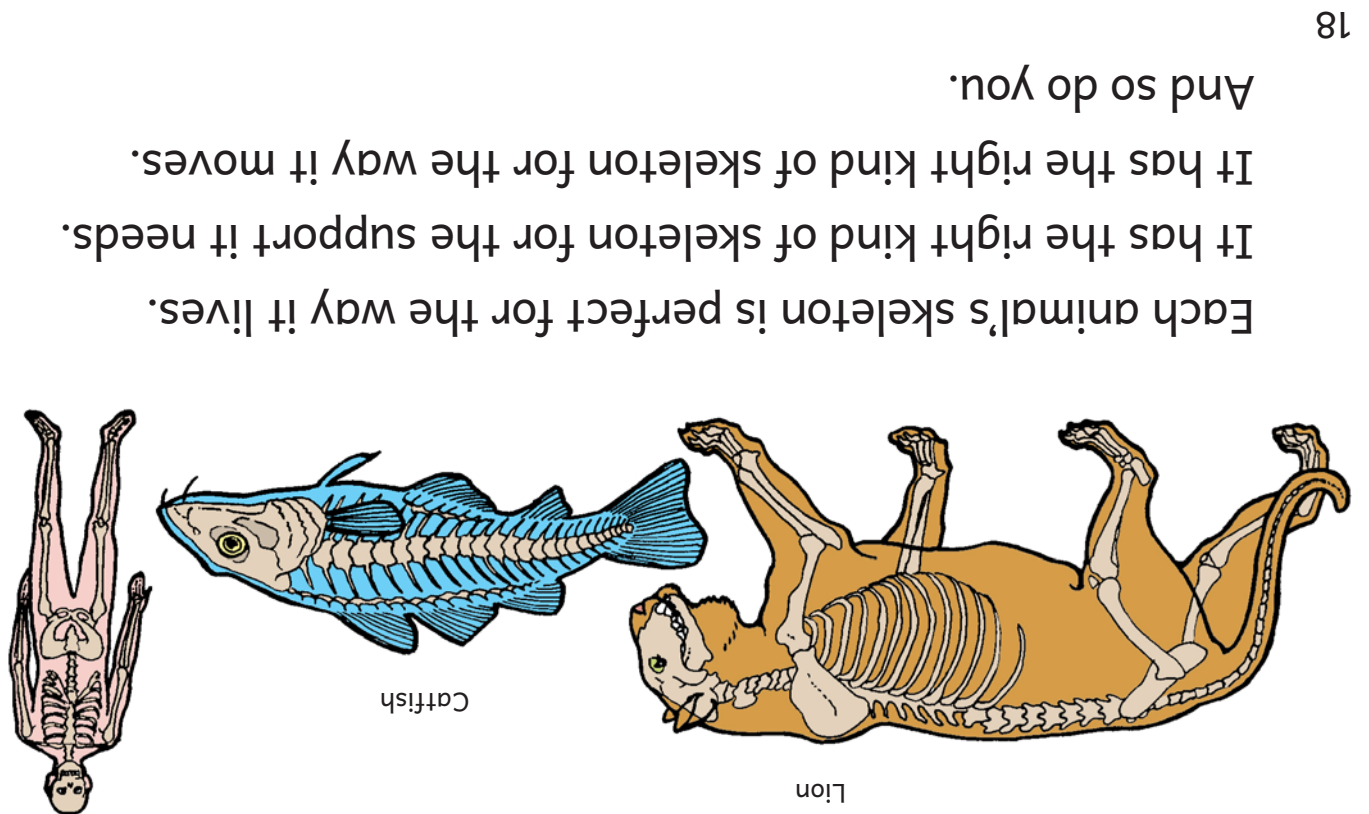

Look at these skulls, or head bones.
 These are the skulls of the animals in this book.
 Look at how their shapes and parts are different.

Animal Skeletons

17

Each animal's skeleton is perfect for the way it lives.
 It has the right kind of skeleton for the support it needs.
 It has the right kind of skeleton for the way it moves.
 And so do you.
